PROFESSIONAL SUMMARY

Data professional and Operations Analyst Intern at AskIITians with hands-on experience building end-to-end data pipelines, cleaning and validating messy datasets, and delivering interactive dashboards. Experienced in Microsoft Fabric and proficient in Python, SQL, PostgreSQL, MySQL, Pandas, Tableau, Power BI, Excel, NeonDB, and AI tools such as Claude and Codex. Pairs analytical depth with an operations mindset to turn raw data into reliable reports and streamlined processes.

PROFESSIONAL EXPERIENCE

Operations Analyst Intern | AskIITians 2026 – Present

- Manage and analyse day-to-day operations in a fast-paced environment, tracking live online-batch sessions, faculty schedules, and session status across multiple grades
- Own the operations MIS: clean and consolidate messy, inconsistent data from multiple sources into structured, analysis-ready trackers and daily reports
- Build and maintain recurring MIS and performance reports in Excel and SQL to monitor key operational metrics, flag anomalies, and support decisions
- Identify process bottlenecks and data-quality gaps, document workflows and SOPs, and coordinate with cross-functional teams to improve turnaround and accuracy

Patent Co-Inventor | Lovely Professional University, Phagwara 2025 – 2026

- Co-inventor on three Indian patent applications; contributed to invention disclosures, prior-art review, and specification inputs, and tracked filing numbers, publication dates, and office correspondence on the IP India portal

KEY PROJECTS

End-to-End Analytics Solution on Microsoft Fabric | Azure Pipelines | Lakehouse | Medallion Architecture | Power BI 2026

- Built an end-to-end analytics project in Microsoft Fabric, using Azure pipelines to ingest source data into a Lakehouse
- Processed data through a Medallion architecture (Bronze, Silver, Gold layers) to clean, standardise, and organise it, using catalogs for governed, discoverable data
- Implemented efficient incremental loads with watermark and change data capture (CDC) techniques to process only new and changed records
- Managed materialised lake views to optimise performance, modelled the curated data into a semantic model, and built interactive Power BI dashboards

CogniCare – Parkinson's Disease Screening App | React Native | Expo | NeonDB 2026

- Built CogniCare end to end, from scratch: a mobile app for early Parkinson's disease screening, developed in React Native (Expo) with a NeonDB (PostgreSQL) backend
- Designed a spiral-tracing test that scores the user's drawing with polar-coordinate analysis to assess motor control
- Handled the full build and published the app on the Google Play Store, where it is live in the testing track

TECHNICAL SKILLS

Programming & Analysis	Python, SQL, Pandas, NumPy, EDA, large-dataset handling, statistical summarisation, trend analysis
Data Engineering	Microsoft Fabric (Lakehouse, pipelines, Medallion architecture, materialised lake views), incremental loads (watermark, CDC), REST APIs, web scraping, data validation, deduplication
Databases & Tools	PostgreSQL, MySQL, NeonDB — joins, aggregations, window functions, CTEs, indexing, schema design; Git version control, Jupyter, VS Code, Azure Databricks, React Native (Expo)
BI & Visualization	Power BI (semantic models, data modelling, DAX basics, interactive dashboards), Tableau, Excel (PivotTables, slicers, conditional formatting), Matplotlib/Seaborn
AI Tools	Claude, Codex, agentic AI workflows
Operations	MIS & KPI reporting, process documentation, workflow optimisation, data reconciliation, cross-team coordination
AI / IP Research	Patent data mining, technical documentation, IPC/CPC classification, InPASS, Espacenet, Google Patents, WIPO

PATENTS & PUBLICATIONS

Smart-ID Based Campus Presence & Safety Management System — App No. 202511104180 | Published 2025
A Smart Therapeutic Mattress System — App No. 202511052262 | Filed 2025
A Smart Urinal System for Early Detection of Chronic Kidney Disease — App No. 202611071811 | Filed 2026
Empirical-Study-Based Analysis of True-Pass System — IJNRD | Vol. 11, Issue 4 | Apr 2026 | Impact Factor 8.76 | Paper ID: IJNRD2604711

CERTIFICATIONS

Complete Guide to Managing Data with Microsoft Fabric: From Beginner to Advanced — LinkedIn Learning, 2026
Databricks for Data Analysts — LinkedIn Learning, 2026
Google Advanced Data Analytics — Coursera, 2025
Data Analytics with Python — NPTEL, 2025

EDUCATION

BCA | Lovely Professional University, Phagwara, Punjab — CGPA: 8.55 2023 – 2026
